DRF Strategies

Why do we need to have DRF Strategies in place?
The Risk Factor

Figure 1: Risk and Hunger: Relationship between disaster impact and food price index

Figure 2: High Exposure and Prevalence of Undernourishment

Financial Resilience

Planning ahead to better manage the cost of disasters, ensure predictable and timely access to much needed resources, and ultimately mitigate long-term fiscal impacts.
The Protection Quartet

The Poorest
DRF Strategy Development: Process Highlights
IMPORTANT FACTS:

- Assessment of Policy and Institutional Landscape
- Documentation of Post Disaster Public Financing Requirement
- Quantification of Contingent Liabilities
- Identification of Priority Areas
- Management of Expectations
Case Study

Comprehensive DRF Strategy: Philippines

Excellent and Balanced Use of Risk Layering Approach
- Sovereign Risk Transfer
- Contingent Line of Credit
- Risk Transfer for Sub-National Level
- Insurance Instruments at various levels

DRF Strategy Development: Pakistan

Average Use of Risk Layering Approach
- Sovereign Risk Transfer
- Contingent Line of Credit
- Excess Reliance on Risk Retention
- No Risk Transfer for Sub-National Level
- Limited Focus on Insurance Instruments
Opportunities to Enhance Stakeholder Buy In
